

A Comparative Survey of Effect Systems in Haskell: Implementing a Scheme Interpreter

ISAAC H. LOPEZ DIAZ, Department of Computer Science, University of Puerto Rico Rio Piedras, Puerto Rico

Additional Key Words and Phrases: effect systems, monads, algebraic effects, Haskell, interpreters

ACM Reference Format:

Isaac H. Lopez Diaz. 2025. A Comparative Survey of Effect Systems in Haskell: Implementing a Scheme Interpreter. 1, 1 (December 2025), 4 pages. <https://doi.org/10.1145/nnnnnnn.nnnnnnn>

1 Introduction

1.1 Motivation

1.2 Contributions

1.3 Overview

2 Background

2.1 Monads and Computational Effects

2.2 The Expression Problem for Effects

2.3 From Monad Transformers to Algebraic Effects

2.4 The Scheme Subset

3 Effect Systems Under Study

3.1 MTL: Monad Transformer Library

3.1.1 Architecture.

3.1.2 Effect Stack for the Interpreter.

3.1.3 Lifting and Constraints.

3.1.4 Advantages and Limitations.

3.2 freer-simple

3.2.1 Architecture.

3.2.2 Effect Representation.

3.2.3 Handler Composition.

3.2.4 Advantages and Limitations.

3.3 Polysemy

3.3.1 *Architecture.*

3.3.2 *Effect Representation.*

3.3.3 *Interpretation Strategies.*

3.3.4 *GHC Plugin and Optimization.*

3.3.5 *Advantages and Limitations.*

3.4 fused-effects

3.4.1 *Architecture.*

3.4.2 *Effect and Carrier Separation.*

3.4.3 *Handler Fusion.*

3.4.4 *Advantages and Limitations.*

3.5 effectful

3.5.1 *Architecture.*

3.5.2 *Static vs Dynamic Effects.*

3.5.3 *Performance Pragmatism.*

3.5.4 *Advantages and Limitations.*

4 Implementation: A Scheme Interpreter

4.1 Abstract Syntax and Shared Infrastructure

4.2 Semantic Domains

4.3 Effects Required

4.3.1 *Reader: Lexical Environment.*

4.3.2 *State: Mutable Bindings and Execution Trace.*

4.3.3 *Writer: Logging.*

4.3.4 *Error: Exception Handling.*

4.4 MTL Implementation

4.4.1 *Type Definitions.*

4.4.2 *Evaluation Function.*

4.4.3 *Running the Stack.*

4.4.4 *Code Observations.*

4.5 freer-simple Implementation

4.5.1 *Effect Definitions.*

4.5.2 *Evaluation Function.*

4.5.3 *Handlers and Interpretation Order.*

4.5.4 *Code Observations.*

4.6 Polysemy Implementation

4.6.1 *Effect Definitions.*

4.6.2 *Evaluation Function.*

4.6.3 *Interpreters.*

4.6.4 *Code Observations.*

4.7 fused-effects Implementation

4.7.1 *Effect and Carrier Definitions.*

4.7.2 *Evaluation Function.*

4.7.3 *Handler Composition.*

4.7.4 *Code Observations.*

4.8 effectful Implementation

4.8.1 *Effect Definitions.*

4.8.2 *Evaluation Function.*

4.8.3 *Dispatching Effects.*

4.8.4 *Code Observations.*

5 Evaluation

5.1 Evaluation Criteria

5.1.1 *Performance.*

5.1.2 *Expressiveness.*

5.1.3 *Ergonomics.*

5.1.4 *Ecosystem Integration.*

5.2 Benchmark Methodology

5.3 Performance Results

5.3.1 *Microbenchmarks.*

5.3.2 *Interpreter Benchmarks.*

5.3.3 *Memory Usage.*

5.3.4 *Compilation Time.*

5.4 Expressiveness Comparison

5.4.1 *Effect Ordering and Reordering.*

5.4.2 *Local vs Global Handlers.*

5.4.3 *Higher-Order Effects.*

5.4.4 *Effect Polymorphism.*

5.5 **Ergonomics Comparison**

5.5.1 *Lines of Code.*

5.5.2 *Type Signature Complexity.*

5.5.3 *Error Message Quality.*

5.5.4 *Refactoring Effort.*

6 **Discussion**

6.1 **When to Use Which System**

6.2 **The Performance–Abstraction Trade-off**

6.3 **Type System Limitations**

6.4 **Comparison with Other Languages**

6.5 **Threats to Validity**

7 **Related Work**

7.1 **Effect System Foundations**

7.2 **Monad Transformers**

7.3 **Algebraic Effects in Haskell**

7.4 **Effect System Comparisons**

7.5 **Interpreters as Effect System Benchmarks**

8 **Future Work**

8.1 **Reflective Effect Systems**

8.2 **Effect Handler Optimization**

8.3 **Formal Verification of Effect Implementations**

9 **Conclusion**

A **Complete Source Code**

A.1 **Shared Infrastructure**

A.2 **MTL Implementation**

A.3 **freer-simple Implementation**

A.4 **Polysemy Implementation**

A.5 **fused-effects Implementation**

A.6 **effectful Implementation**

B **Benchmark Programs**

B.1 **Factorial**

B.2 **Fibonacci**

B.3 **List Operations**

B.4 **Environment-Heavy Workloads**

B.5 **Error-Heavy Workloads**

C **Raw Benchmark Data**
